Safety & Compliance Training

Established in 1995, FSN Training provides clients with the highest quality training programs available. All FSN programs are aimed at maintaining compliance, improving safety and increasing productivity.

FSN, in association with the Propane Training Institute, the training arm of the Canadian Propane Association, offers a full range of propane industry programs and Records of Training. In addition FSN offers Aerial Lift, Forklift, Skid Steer, Fall Protection, WHMIS, Transportation of Dangerous Goods and other safety related training.

In order to help customers maintain compliance, FSN continuously monitors legislative changes and updates its programs. FSN also maintains a database of all completed training and provides customers with training reports and certificates.

On-Site Quality Training

FSN has a network of trainers throughout Ontario and Atlantic Canada enabling them to provide on-site training to its customers. Each FSN instructor is a trained professional who uses only high quality training materials developed by experts in each field.

A variety of teaching techniques are used by FSN and most courses have a "hands on" component to help maximize the student's involvement in the learning process.

Benefits of using FSN Training

- Using FSN trainers frees up time for customer employees to focus on other job requirements
- FSN trainers deliver well organized programs with the latest materials
- On-site programs and convenient times lead to less down time
- Improved safety leads to lower related health costs
- Oral, written and practical exams confirm student understanding
- FSN's reports and certificates help employers illustrate due diligence
- Proper procedures and less down time create improved productivity
